PROSTATE CANCER

IS THE MOST COMMON CANCER IN CYPRUS IN MEN

DO YOU HAVE?

- Frequent urination, especially at night?
- Sudden need to urinate or leakage of urine?
- Difficulty starting urination?
- A weak flow when you urinate?
- Feeling your bladder has not emptied properly?
- Dribbling urine after finishing urinating?
- Sudden erectile dysfunction?

RISK FACTORS

- **AGE:** Mainly affects men over 50 and the risk increases with age
- **FAMILY HISTORY:** More likely to get it if your brother or father had it
- **OBESITY:** Living an unhealthy lifestyle and low levels of physical activity
